Intestinal Epithelial Barrier in Autoimmune Diseases

Call for Application

BioMed X will establish a new research group in the field of immunology.

1 Group Leader (m/f)
3 Postdoctoral Researchers (m/f)
2 Research Assistants (m/f)

Changes in gut microbiome have been shown in various autoimmune disorders. Do these changes indicate a primary epithelial barrier defect or are they an effect of chronic inflammation over the intestinal barrier function?

Application deadline: April 7, 2019

About BioMed X

The BioMed X Innovation Center is an exciting collaboration model at the interface between academia and industry. At our center, distinguished early career scientists recruited from all over the world are working jointly on novel pre-clinical research projects in the fields of biomedicine, molecular biology, cell biology, and diagnostics.

This research project is sponsored by Merck.
